Dec 2011
RS 15 package

It's a *great* time to get into PCD tooling!

With the resurgence of automotive manufacturing and auto's reliance on aluminum and other alloys *plus* the continuing boom in aerospace and *that* industry's use of composites, it's a *great* time to get into PCD tooling. The natural first step is a high quality manual tool grinder. And the best such machine is the EWAG RS 15.

The shrinking dollar has made that investment a stretch. Until now! We're offering Swiss precision for *20% less* than you would have paid just a few days ago. And you have the option of a machine for inserts, or rotary tools, or both. Your benefits include:

- High precision & productivity
- Grinding and measuring in one clamping
- Pressure controlled grinding
- Rigid design = high material removal
- Grinding wheel regeneration unit
- Continuous wheel oscillation

*The RS 15 offers high precision & productivity:
set, grind, & inspect in one clamping*
