

Total Life Cycle Solutions

Providing you
with a lifetime of
service

A black and white photograph of a sailboat's deck. The deck is white with blue ropes and a dark banner across the middle containing the text "Provide Complete Service". The background shows the sea and a distant shoreline under a cloudy sky.

Provide Complete Service

Delivering the care you need isn't a one time event

Service shouldn't begin when your machine breaks down and your production lines grind to a halt. Likewise, service shouldn't end when your machine is installed and producing parts. Ensuring our customers have access to cutting edge products and receive the best possible care, is a continuous process at United Grinding. Service should span the entire life cycle of the machine, from determining your needs to retooling and rebuilding your machine when your production challenges change.

United Grinding provides a complete package of services designed to meet your challenges from day one. Set your own course by selecting the services that fit your unique requirements.

Application support

Machine installation

Operator training

Maintenance training

Preventative maintenance

Service and repair

Machine rebuilding and retooling

Spare parts

Extended warranty

A close-up, black and white photograph of a person's lower leg and foot. The person is wearing a grey athletic shoe with a prominent black strap across the midfoot. The shoe is positioned on a blue foam roller, which is placed on a grey track surface. The background is blurred, showing other people in athletic wear, suggesting a track or gym setting. A semi-transparent black banner is overlaid on the left side of the image, containing the text "Focus on Your Needs" in white, sans-serif font.

Focus on Your Needs

Knowing what will make you successful means defining your goals

Every part and every organization has its own unique set of challenges that must be met head on. United Grinding's highly experienced applications engineers have the know-how to help you solve your grinding problems with solutions that promote your efficiency and profitability.

Taking advantage of our expertise and turnkey services can be your first step towards success.

Time studies

Tooling and workholding recommendations

A close-up photograph of a blue ball, possibly a beach ball or a similar textured sphere, resting inside a white goal net. The net is made of thick white ropes forming a diamond pattern. The background is a bright, overcast sky with soft, white clouds. A dark horizontal bar is overlaid on the left side of the image, containing the text "Ready to Deliver" in white.

Ready to Deliver

When your machine arrives, you need focused support

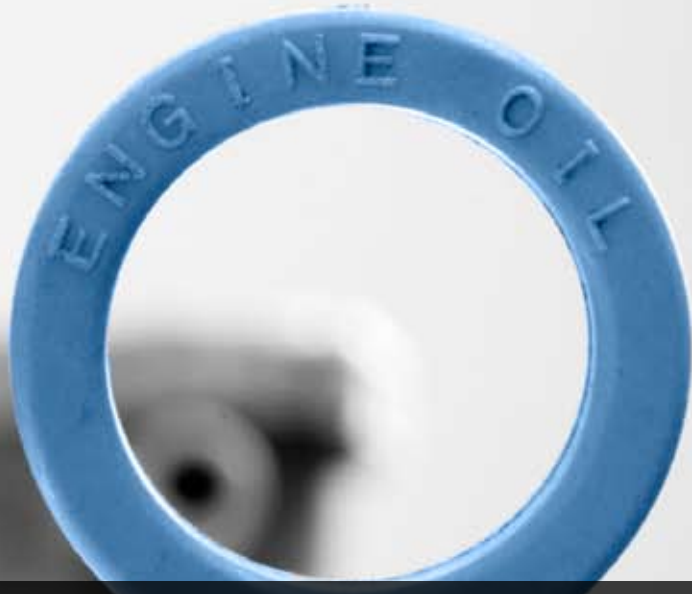

Placing a new CNC grinding machine on your plant floor can be a daunting experience. Your personnel will need to be familiar with new operating systems, hardware and controls. United Grinding will be with you to ensure your maintenance technicians are capable of maintaining your new machine and that your operators are prepared to excel.

Realizing a smooth start means optimizing the opportunity to reach your goals.

Maximize Performance

Maintaining high performance requires you to plan for ongoing care

Ensuring your machine continues to perform at the peak of its capability means that you must invest in an ongoing maintenance program. Preventative maintenance allows you to control when the machine goes down. Without preventative maintenance, the machine will determine when it will not be available, with the possibility of costly repairs and loss of productivity.

United Grinding can provide the machine care you need to maximize productivity while keeping costs in check.

Extended warranty programs

Maintenance training

Preventative maintenance

Prepared for Change

Changing course doesn't mean your machine can't change with you

Buying a CNC grinding machine is an investment in your company's future. When your business changes, you can't afford to see that investment go to waste. United Grinding provides a range of services designed to extend the lifetime of your machine.

Changing direction is an opportunity to maximize your machine's usefulness.

Machine rebuilding

Machine retooling

Machine retrofits

Service and care should follow throughout your machine's life cycle. If you have questions about any of the products and services offered by United Grinding, we would like to hear from you. Give us a call.
